

Below are the lists of endpoints we have tried hitting and got an error we do not comprehend. We do understand that some of the endpoints require certain parameters to be passed as request payload, but we do not currently have them. Kindly go through them and provide us with all static data we need to pass to all the endpoints you have given to us.

NOTE: These are endpoints we have had issues with so far, we will be adding more to the lists when the need arises.

And kindly provide us with more data that think we need to have to be able to consume the endpoints

1. <https://banca.turnkeyafrica.com/brokerage-service/api/policies/?user=TQUEST>;
When we hit this endpoint via postman with the request payload provided in the excel sheet, we got this response. We did change some of the parameters and tried again, but we got the same error.

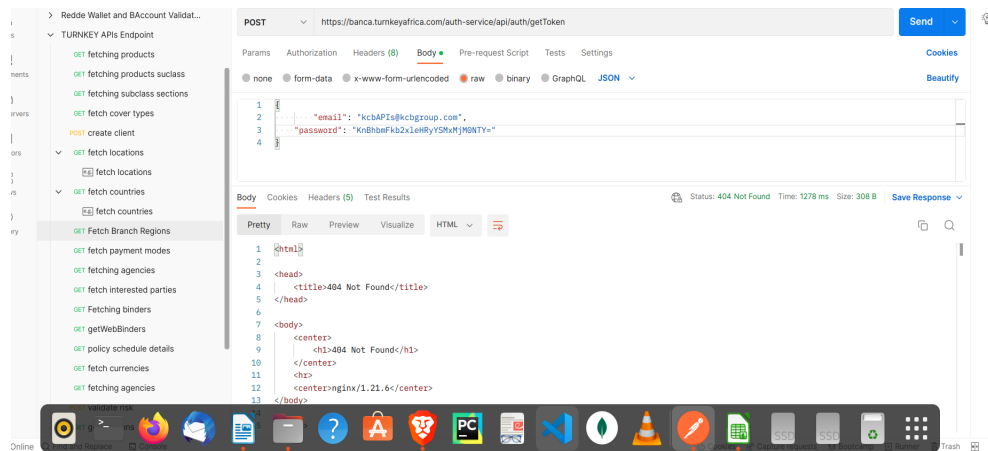

2. **No endpoint for creating Quotation.** We have noticed that there is no endpoint for creating quotations. However there are other endpoints revolving around quotation but we are not able to test any of them because they require quoteCode parameter to be added to the request payload.

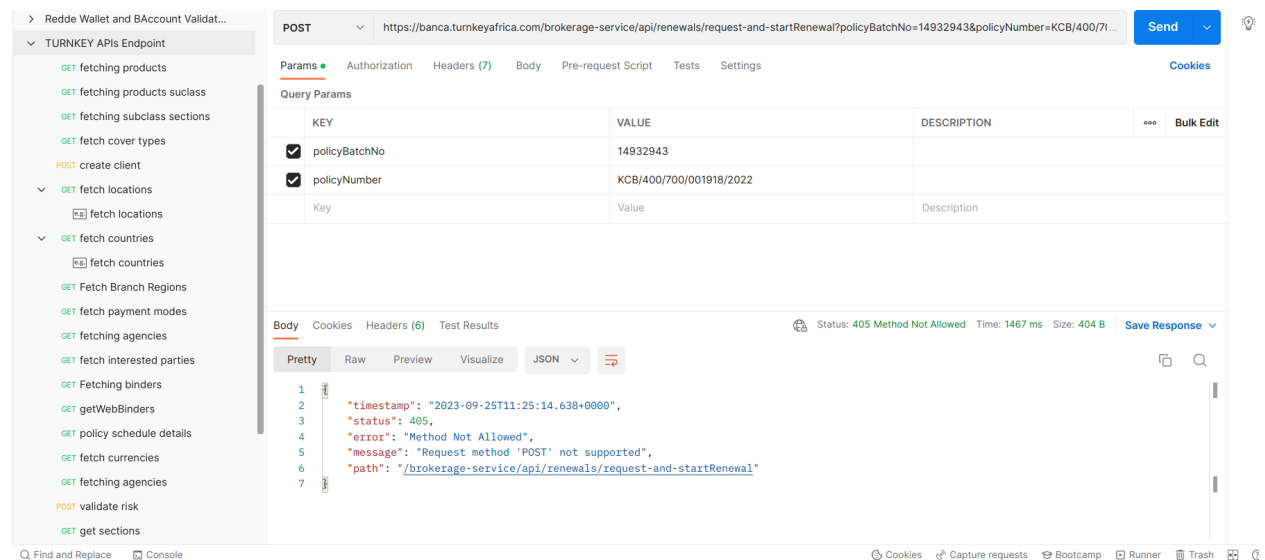

The following are lists of endpoints that require quoteCode

- a. [/api/quotation/motor-schedule](#) (POST)
- b. [/api/quotation/saveClientWebQuote](#) (POST)
- c. [/api/quotation/validateRisk](#) (POST)
- d. [/api/quotation/computePrem](#) (post)

3. Auth Endpoint Not Found: The auth endpoint throws a 404 error when we tried hitting it with the sample payload provided

4. Policy Renewal (Method Not Allowed); This endpoint throws a method not allowed error when we hit it with POST Method as instructed in the excel sheet. We copied the sample request provided and passed policyNumber and policyBatchNo as query params but got the above error.

5. Submit to Authorizer endpoint (Method Not Allowed); This endpoint also throws a method not allowed error when we hit it.

The screenshot shows a REST client interface with a sidebar on the left containing a list of endpoints. The selected endpoint is `POST https://banca.turnkeyafrica.com/brokerage-service/api/policies/make-ready?policybatchNo=231314874&policypreparedBy=TQUEST`. The request is a POST with query parameters `policybatchNo=231314874` and `policypreparedBy=TQUEST`. The response status is `405 Method Not Allowed` with a time of 242 ms and size of 395 B. The response body is as follows:

```
1 {
2   "timestamp": "2023-09-25T11:55:06.774+0000",
3   "status": 405,
4   "error": "Method Not Allowed",
5   "message": "Request method 'POST' not supported",
6   "path": "/brokerage-service/api/policies/make-ready"
7 }
```

6. Motor Policy Endpoint throws 400 (Bad Request); We used the sample request provided in the excel sheet and got this error.

The screenshot shows a REST client interface with a sidebar on the left containing a list of endpoints. The selected endpoint is `POST https://banca.turnkeyafrica.com/brokerage-service/api/policies/?user=TQUEST`. The request is a POST with a JSON body. The response status is `400 Bad Request` with a time of 2.43 s and size of 1.29 KB. The response body is as follows:

```
1 {
2   "status": "BAD_REQUEST",
3   "errorType": "ERROR",
4   "message": "org.springframework.http.converter.HttpMessageNotReadableException: JSON parse error: Unrecognized field \"insurerpolicyNo\" (class com.turnkeyafrica.brokerage.policy.models.KcbPolicyDto), not marked as ignorable; nested exception is com.fasterxml.jackson.databind.exc.UnrecognizedPropertyException: Unrecognized field \"insurerpolicyNo\" (class com.turnkeyafrica.brokerage.policy.models.KcbPolicyDto), not marked as ignorable (24 known properties: \"introducerCode\", \"clntShtDesc\", \"binderType\", \"familySize\", \"wedDate\", \"installmentDate\", \"paymentMode\", \"coinsurance\", \"agentCode\", \"frequencyofPayment\", \"wedDate\", \"marketerCode\", \"binderCode\", \"insurer\", \"productName\", \"clntCode\", \"riskInformation\", \"currencyCode\", \"premiumFinancierCode\", \"subAgentCode\", \"transactionType\", \"otherInterestedPartyCode\", \"productCode\", \"remarks\")\n at "
```
